

eVision Systems and dPict Imaging signed a distribution agreement

Munich, Germany, August 31, 2024 – **dPict Imaging**, headquartered in Indianapolis, USA, a designer and manufacturer of video acquisition technologies for OEM video solutions, signed a Distribution agreement with **eVision Systems GmbH**, a German company renowned for their development and sales of Video Interfaces under the AIVION brand.

This partnership brings together two industry leaders with a strong track record of innovation and customer satisfaction in video technology. The agreement aims to enhance the availability and support of dPict Imaging's advanced video solutions across Europe through eVision Systems' established distribution network.

"We are excited to partner with eVision Systems GmbH," said Brian Pinto, Co-Founder & Director of Sales at dPict Imaging, Inc. "This collaboration allows us to bring our cutting-edge video acquisition technologies, such as the DP-810 video IP encoding module for 4K block cameras, to a broader European market. By leveraging eVision's robust distribution network and expertise, we can ensure that our innovative solutions in machine vision, medical imaging, and security reach new heights in customer satisfaction and market penetration."

Michael Geissel, Director of Video Business at eVision Systems, shared his enthusiasm about the partnership: "We are delighted to join forces with dPict Imaging. This partnership aligns perfectly with our mission to deliver state-of-the-art video interface solutions. Including dPict's advanced technologies will significantly enhance our product offerings and provide our customers with unparalleled video acquisition products that support a wide variety of video inputs, including standard definition NTSC/PAL, HDMI, SDI, HDTV, and Camera Link. We look forward to a successful collaboration that drives innovation and growth in the European market."

About eVision Systems GmbH

Since the foundation of eVision Systems GmbH in 2002, we have set the goal of supporting ASIC and FPGA designers with innovative and modern design methodologies.

Today, we offer a comprehensive range of software, simulation, test & measurement tools for design automation, whose application segments range from the creation of system specifications to hardware & software development, to prototyping and commissioning. Excellent customer service is a top priority for eVision Systems. This also represents the company motto, “Your Success is our Mission”, which serves as a guiding principle for our partners and us.

In every phase of the use of our tools and your project, we are happy to support you with our specialist knowledge and decades of expertise. We make our “know-how” available in training courses and other services to round off our support.
